

## Senior Web Software Developer

(Job Code: SWSD)

### ***Job description:***

We are looking for a highly motivated, goal-oriented individual who will be responsible for designing, building and maintaining sections of the website frontend as well as backend infrastructure. The successful candidate should be an experienced self-driven, flexible, highly independent worker as well as an excellent team player, able to work efficiently under tight deadlines with strong web application development skills.

### ***Responsibilities:***

- Produce high quality, well-documented and tested code in Ruby on Rails
- Support and maintain existing application functionality by writing scalable, well-factored, and well-tested application-layer code
- Develop amazing prototypes quickly
- Research and make technology suggestions
- Perform architectural level assessments of existing technology and help design future systems
- Assist in tasking and estimation sessions for each iteration
- Contribute in QA testing and bug fixing

### ***Requirements:***

- BS or MS in Computer Science or related technical discipline with 5 or more years of industry experience
- Solid foundation in Computer Science with strong competencies in data structures, algorithms and software design (strong OO skills)
- 2 or more years of programming experience in Ruby and Ruby on Rails
- Several years of large system software design and development experience with knowledge of Unix/Linux or MacOS X
- Expert web application development experience in HTML, Object-oriented JavaScript / AJAX, CSS
- Good knowledge of Internet technologies (e.g. TCP/IP, HTTP)
- Experience working on cross-browser platforms
- User Interface design knowledge
- Troubleshooting skills
- Hands-on experience working with SQL databases (MySQL or PostgreSQL)
- Prototype / JQuery JS framework knowledge is a plus
- Network programming skills are a plus
- Experience contributing to Open Source projects is a plus

***Personal Characteristics:***

- Ability to work in an Agile, XP environment
- Able to work in a fast-paced environment
- Highly committed to good quality results
- Self driven / self managed
- Excellent organization and communication skills
- Passion for programming
- Fluency in Greek and English
