

## Web Software Developer

(Job Code: WSD)

### ***Job description:***

We are looking for a highly motivated, goal-oriented individual who will be responsible for building and maintaining sections of our website frontend as well as backend infrastructure. The successful candidate should be a self-driven, flexible, highly independent worker as well as an excellent team player with strong web application development skills.

### ***Responsibilities:***

- Produce high quality, well-documented and tested code in Ruby on Rails
- Design, implement and launch highly-visible, user-facing features
- Develop amazing prototypes quickly
- Contribute in QA testing and bug fixing

### ***Requirements:***

- BS or MS in Computer Science or related technical discipline with 1 or more years of industry experience
- 1 or more years of programming experience in Ruby and Ruby on Rails **or** at least 3 years of programming experience in Java or PHP (with strong OO skills)
- Sound HTML, Object-oriented JavaScript / AJAX, and CSS skills
- Web application development experience
- Experience working on cross-browser platforms
- User Interface design knowledge
- Experience in a Unix/Linux or MacOS X environment
- Hands-on experience working with SQL databases (MySQL or PostgreSQL)
- Prototype / JQuery JS framework knowledge is a plus
- Experience contributing to Open Source projects is a plus

### ***Personal Characteristics:***

- Ability to work in an Agile, XP environment
- Creative and able to work in a fast-paced environment
- Highly committed / fast learner
- Passion for programming
- Attention to detail
- Fluency in Greek and English
